

ABDIHAKIM SAID

Cloud & Platform Engineer · AI Infrastructure & FinOps · AWS SAA · CKA

 London, UK  abdihakimsaid1@gmail.com  LinkedIn  github.com/abdihakim-said

SUMMARY

Cloud and platform engineer with 6 years in production infrastructure, most of it in regulated healthcare. I build platforms on **Azure and AWS** with infrastructure as code (Terraform), Kubernetes and GitOps, CI/CD and DevSecOps pipelines, and SRE practice (SLOs, observability, runbooks, postmortems). I specialise in cloud cost (**cut AWS costs 63%** at Moorfields) and in running LLM features safely: least-privilege access for AI agents and tools, and deterministic checks around model output. Founder of HumanLayer AI Ltd; available for fixed-price projects and contracts through the company.

CORE TECHNICAL EXPERTISE

Cloud

Azure (AKS, Key Vault, ACR, AI Speech) · AWS (EC2, EKS, Lambda, DynamoDB, S3, IAM, CloudWatch, Bedrock) · GCP (GKE, Vision AI)

IaC & CI/CD

Terraform, Packer, CloudFormation · Kubernetes, Helm, ArgoCD (GitOps) · GitHub Actions, Jenkins, AWS CodePipeline

DevSecOps

Trivy, tfsec, Checkov, Semgrep, Gitleaks, SBOMs · IAM least privilege, permission boundaries · GuardDuty, Security Hub

Observability & SRE

OpenTelemetry, Prometheus, Grafana, CloudWatch, ELK, Jaeger · SLOs, error budgets, on-call, runbooks, postmortems

AI Infrastructure & FinOps

LLM integration: OpenAI (tool calling), Amazon Bedrock, Azure AI · Least-privilege and ownership checks for AI agent tools · Cloud cost: right-sizing, scheduling, cost automation

Languages & Systems

Python, Bash, PowerShell, TypeScript/Node.js · Windows Server, Active Directory, SQL

PROFESSIONAL EXPERIENCE

Founder & Cloud / AI Infrastructure Consultant

HumanLayer AI Ltd | February 2026 - Present | London, UK

- Fixed-price AWS cost & reliability reviews, AI spend & guardrails reviews, and implementation sprints for UK teams

- ▶ Public reference builds with documented limitations; fixes shipped with tests (Cognito JWT authorizer on 39 API routes, ownership-checked AI agent tools)

Site Reliability Engineer & Cloud Infrastructure Specialist

Luul Solutions Ltd | March 2022 - Present | London, UK

- ▶ Implemented an SLA/SLO/SLI framework with automated monitoring across 15+ services
- ▶ Built and maintained reusable Terraform for multi-cloud provisioning (AWS, Azure, GCP)
- ▶ Ran production Kubernetes (EKS, AKS, GKE) and CI/CD with GitHub Actions and AWS CodePipeline
- ▶ Built monitoring, logging and alerting (Prometheus, Grafana, CloudWatch, ELK) with on-call rotation, runbooks and postmortems

Cloud Engineer & Infrastructure Specialist

Moorfields Private Eye Hospital | February 2021 - March 2022 | London, UK

- ▶ Reduced AWS costs by **63%** through right-sizing, automation and scheduling
- ▶ Ran highly available infrastructure for patient-facing systems at **99.95%** uptime
- ▶ Implemented monitoring and alerting for critical healthcare systems; took part in on-call rotation
- ▶ Built automated backup and disaster-recovery procedures, with regular testing

System Administrator & Production Support

Chelsea & Westminster Hospital NHS Foundation Trust | March 2020 - February 2021 | London, UK

- ▶ Administered Windows Server, Active Directory, DNS and Group Policy for 1,000+ staff
- ▶ Automated patching and maintenance with PowerShell; managed Remote Desktop Services for clinical remote access
- ▶ Maintained SQL databases for hospital management systems and automated secure SFTP transfers between departments

REFERENCE BUILDS (OWN ACCOUNTS, NOT CLIENT SYSTEMS)

Jenkins on AWS: golden-AMI factory + Terraform platform

github.com/abdihakim-said/jenkins-enterprise-platform

Packer golden AMIs with Trivy/Inspector scanning, 11 Terraform modules, EFS-backed disposable controller, security-gated infrastructure pipeline. Deployed in a dev account.

GitOps + DevSecOps platform on Azure AKS

github.com/abdihakim-said/robot-shop-azure-platform

Layered Terraform, build-once/promote-by-Git, ArgoCD, Key Vault CSI, Trivy gate + SBOM, SLO alerting, around the open-source Robot Shop app.

AI-assisted IAM provisioning (prototype)

github.com/abdihakim-said/cloudmart-enterprise-iam-automation

Amazon Bedrock drafts IAM policies; permission boundaries and MFA enforcement; roadmap for deterministic validation with IAM Access Analyzer.

Serverless multi-cloud AI (prototype, sample data)

github.com/abdihakim-said/healthhub-enterprise-platform

7 Lambda services orchestrating Azure Speech, OpenAI and Google Vision with Polly/Translate.

EDUCATION & CERTIFICATIONS

BSc Computer Science

University of Greenwich, London, UK | 2016-2019

Certifications: AWS Certified Solutions Architect – Associate · Certified Kubernetes Administrator (CKA)
